High-impact executive with 6+ years of experience (inclusive of accelerated leadership roles) modernizing finance functions at Tier-1 institutions. Expert in aligning fiscal strategy with operational technology to drive massive efficiencies ($35M+ annual impact). Proven track record in operating-model redesign, data governance, and leading cross-functional teams to scale operations in high-volume, fast-paced environments. Proven ability to deliver $35M+ in AI-driven operational efficiencies by automating 0-to-1 workflows in high-stakes environments.

EXPERIENCE

Credit Agricole CIB • 2022–Present - Finance Data Lead - Head of CFO Solutions Team, New York
- Strategic Advisory: Serve as a primary advisor to senior leadership on operating-model redesign and future-state Finance architecture, ensuring alignment with global regulatory expectations and capital requirements, as well as, modern technology trends and agent workflows.
- P&L Impact: Engineered AI-driven automation and analytics strategy delivering $25M–$35M in annual operational efficiencies, directly improving the firm's bottom line and resource allocation.
- Organizational Transformation: Scaled a 75-person Finance organization's capabilities by deploying AI/ML and RPA, reducing reporting cycles by 25% and human error by 85%.
- Talent Leadership: Lead and mentor cross-functional teams; foster a culture of data-driven decision-making and continuous process improvement across Finance and IT.
- Establish cross-functional partnerships with ALM, Treasury, Risk, and IT to ensure solutions align with regulatory expectations, data-quality requirements, and senior-management priorities.
- Develop and implement statistical and machine learning models using Dataiku and Knime that address forecasting and stress testing needs such as forecasting client cash flow and utilization needs.

V2A Consulting • 2021 — Consultant/Analyst, San Juan, PR
- Risk Mitigation & Rapid Prototyping: Built and deployed bespoke KPI dashboards and automation software that reduced UAT (User Acceptance Testing) timelines by 15% and enabled leadership to preemptively mitigate 10+ critical risks within the first three months of go-live.
- Operational Excellence: Orchestrated the delivery of bespoke software solutions that automated high-volume workloads, reclaiming significant organizational capacity (2 FTEs per project).

NJIT Investment Fund & Endowment • 2018–2020 — President & Portfolio Manager
- Created quantitative trading models that improved YoY performance by 315%, reduced risk by 35%, and outperformed the benchmark by 8.5%.
- Automated portfolio rebalancing and risk monitoring to enhance governance, consistency, and analytical accuracy.
